DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection. The Applicant has amended claim 1 to include the new limitation of "wherein the hooks are configured to engage two blood vessels to form a fluid-tight connection between an opening in the sidewall of one of the two blood vessels and the other of the two blood vessels". The new limitation changes the scope of the claims requiring a new search and new consideration. A new ground(s) of rejection is made in view of Sakura, Jr. 4214587.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Sakura, Jr. 4214587.

4. Sakura, Jr. teaches a method of guiding hooks of an anastomotic connector into an aperture of a blood vessel, comprising: surrounding the hooks with a mechanical element that compresses them towards each other; insertion the compressed hooks into an aperture of a blood vessel, wherein the hooks are configured to engage two blood vessels to form a fluid-tight connection between an open in a sidewall of one of

the said two blood vessels and the other of the two blood vessels; and releasing the hooks, wherein surrounding comprises inserting the hooks into a wire loop.

Pronunciation: 'huk

Function: *noun*

Etymology: Middle English, from Old English *hOc*; akin to Middle Dutch *hoec*

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
